At TomTom...

You'll move the world forward. Every day, we create the most innovative mapping and location technologies to shape tomorrow's mobility for the better.

We are proud to be one team of more than 5,000 unique, curious, passionate problem-solvers spread across the world. We bring out the best in each other. And together, we help the automotive industry, businesses, developers, drivers, citizens, and cities move towards a safe, autonomous world that is free of congestion and emissions.

Our Internship opportunities...

Are you looking for an internship where you will work with some of the newest technologies? How about a fast-paced environment along with a great team dynamic? TomTom is looking for interns who are ready to build the future of mobility using modern technologies. You do not need to be an expert in any specific technology, but you do need to have a passion and creativity to explore new technical challenges.

What You'll Do
- Grow under the guidance of your mentor;
- Understand product requirements and participate in project development within the scrum teams;
- Implement product features for our backend services using modern C++;
- Learn how to design unit and integration tests for the implemented features;
- Collaborate with other team members;
- Participate in complex algorithm development

What you'll need
- BS or MS in Computer Science or equivalent work experience. However, if you're talented, degrees aren't everything;
- Strong software engineering skills;
- Solid knowledge of object-oriented design;
- Good command of the modern C++;
- Ability to show understanding of algorithms, data structures and other systems architecture factors that affect code quality, performance, and customer experience;
- Problem-solving mindset along with the ability to combine technical and analytical skills;
- Advanced level of English language

What we offer:
- Paid Internship with flexible working hours;
- Challenging role in an open, innovative, and international culture;
- Possibility to experience and take part in a real life projects and deliver genuine business value;
- Company culture that loves to work hard and play hard; in short, we like to have fun. There is no sense coming to a job every day if you don't like the people you're working with;
- Have an idea? A suggestion? A new way of doing something? The founders are still very present in the company and are very accessible. We all are. There is always room for innovative ideas. Entrepreneurialism is valued

Meet your team

We're Navigation, a product unit within TomTom's Location Technology Products technical unit. We develop software for onboard, hybrid, and online navigation applications – used by hundreds of millions of people around the world. Using a Navigation Data Standard (NDS) run-time format, our software includes navigation domain logic for traffic-dependent routing, route guidance, map visualization, search, positioning, and machine learning-based predictions and suggestions. On our team, you'll see your work transforming connected and embedded navigation around the world.

Achieve more

We are self-starters who play well with others. Every day, we solve new problems with creativity, meet new people and learn rapidly at our offices around the world. We will invest in your growth and are committed to supporting you. In everything we do, we're guided by six values We care, putting our heart into what we do; we

build trust (you can count on us); we create – driven to make a difference; we are confident, but don't boast; we keep it simple, since life is complex enough; and we have fun because life's too short to be boring.

After you apply

Our recruitment team will work hard to give you a meaningful experience throughout the process, no matter the outcome. Your application will be screened closely, and you can rest assured that all follow-up actions will be thorough, from assessments and interviews through your onboarding.

TomTom is an equal opportunity employer

We celebrate diversity, thrive on each other's differences and are committed to creating an inclusive environment at our offices around the world. Naturally, we do not discriminate against any employee or job applicant because of race, religion, color, sexual orientation, gender, gender identity or expression, marital status, disability, national origin, genetics, or age.
