Resavska 48, Belgrade, Serbia | 063/17-28-476 | momcilo@protonmail.com

## Education

HIGH SCHOOL | 2009-2013 | SCHOOL OF ELECTRICAL ENGINEERING NIKOLA TESLA  
BELGRADE

SOFTWARE ENGINEERING DEGREE | 2013- | FACULTY OF ELECTRICAL ENGINEERING,  
UNIVERSITY IN BELGRADE

## Experience

I'm not afraid of getting my hands dirty as I have done some physical labor (cleaning snow, constructing/deconstructing TV show sets, working security etc.).

I've also done some work online (filling out surveys, helping designers test their work, writing resumes and articles) for some extra pocket money.

As for technical experience, most of my projects have been university related and include:

- Simulating the operating system of an 8086 processor.
- System for a shopping business that communicates with JMS and uses a SQL database.
- Writing a program that uses a Siemens S7-1200 PLC for motor control.

## Skills & Abilities

### TECH SAVVY

- I've been around computers since early on in my childhood and have gone down the path to study them properly. So there isn't much technology that I don't know at least something about. I also spend some of my free time tinkering with whatever I can find.
- I've mostly focused on Java, C, C++ but I also have a very good understanding of UML, SQL, HTML, CSS, JS
- I'm also familiar with PHP, Pascal and some Python

### MANAGEMENT

- I excel at organizing my time so I can do the most of what I have planned with leaving enough wiggle room for unexpected developments.

### BILINGUAL

- Serbian - native
- English – near native
- Serbian mixed with English is how I usually talk because a good part of modern technology doesn't have a translation.

### COMMUNICATION

- Working security, I learned how to talk to people from all walks of life, find a common ground and get my point across.

### ADDITIONAL SKILLS

- Drivers license (B category)
